MEDIA ALERT

HOW UNIFIED FIELD-BASED ARCHITECTURE CAN MAKE THE NATION INVINCIBLE

**Dr. John Hagelin to Offer a Comprehensive New Approach
to Eliminate Problems through Architecture
in Harmony with Natural Law**

"This will ensure health, fortune, and security for every nation"

**GLOBAL CONFERENCE ON
UNIFIED FIELD-BASED ARCHITECTURE AND CITY PLANNING
Thursday, July 17 * 11:30 AM
Global Financial Capital of New York
70 Broad Street**

Governments can eliminate at least 50 percent of the problems of disease, conflict, and negativity in their countries by reconstructing the homes, offices, government buildings-and entire cities-in the nation according to a new Unified Field-based approach to architecture in harmony with Natural Law.

Such a program of national reconstruction will maximize the happiness, health, and fortune of

the people-and create a peaceful, prosperous, invincible nation.

This will be the message delivered to UN ambassadors, government leaders, and urban planners by Dr. John Hagelin, world-renowned quantum physicist and executive director of the International Center for Invincible Defense, along with a panel of distinguished experts during the "Global Conference on Unified Field-Based Architecture and City Planning" to be held on Tuesday, July 17, at the Global Financial Capital of New York, 70 Broad Street.

The conference will be webcast live at www.GlobalFinancialCapitalNY.org. Members of the press are invited to attend in person.

Dr. Hagelin will explain the crucial importance of aligning a building and a city to be in harmony with Natural Law. According to Dr. Hagelin, Natural Law administers the infinite diversity of the ever-expanding universe with perfect order. "Natural Law has its ultimate origin in the Unified Field-the Constitution of the Universe. This is the foundational level of Natural Law, which governs the self-interacting dynamics of unity at the basis of all diversity. Constructing a building-or structuring a city-in accordance with these fundamental laws, as codified in the mathematical prescripts of Vedic architecture, will bring perfect order and unrestricted progress to the people and to the nation as a whole," Dr. Hagelin says.

Unified Field-Based Architecture promotes "fortune-creating" buildings

According to Dr. Eike Hartmann, Minister of Global Reconstruction of the Global Country of World Peace, Unified Field-Based architecture is "Vedic architecture," which has been brought to light by Maharishi from the ancient Vedic literature. Maharishi Vedic Architecture provides the complete knowledge of proper orientation, placement, and proportion needed to construct "fortune-creating" buildings, cities, and entire nations.

"People do not commonly understand that a great deal of suffering, anxiety, sickness, and negativity is due to the wrong orientation of buildings and offices," Dr. Hartmann says.

Dr. Hartmann cites extensive scientific research showing that the human brain is highly sensitive to orientation. "Research confirms that the firing patterns of neurons in the thalamus of the brain are altered by the direction an individual is facing. When an individual faces east, the brain physiology functions differently than when the same individual faces north, south, or west," says Dr. Hartmann. "This means that the quality of brain functioning-and therefore the quality of thought-depends upon the direction an individual is facing. So when an individual lives or works in a building with wrong orientation, it produces physiological, psychological and behavioral imbalances."

Dr. Hartmann says that the program to reconstruct the world offered by the Global Financial Capital of New York will provide the proper eastern orientation, as well as proper placement and proportion, to all buildings to promote the balance, health, and happiness of the individual and society.

As the first step, Dr. Hartmann is calling on government leaders to immediately demolish all improperly oriented government buildings-where decisions are made that impact the destiny of the whole population-and to reconstruct them to be in harmony with Natural Law. "These buildings should be demolished as if they were hit by an earthquake," Dr. Hartmann says.

Governments invited to build "invincible cities"

Dr. Hartmann is inviting the UN ambassadors in New York and government leaders and urban planners in every country to contact the Global Financial Capital of New York to receive the steps to reconstruct their cities and the entire nation in harmony with Natural Law. "Then the cities will have such a high level of internal coherence that they will be 'invincible cities.' They will naturally dispel outside negative influences-in the same way, according to the Meissner Effect of quantum physics, that a high level of internal coherence within a system expels disruptive external influences. Then the country as a whole will rise above problems," Dr. Hartmann says.

"Why allow your people to suffer any longer?"

Dr. Hartmann emphasizes that the knowledge of Unified Field-based, Vedic architecture is now available to immediately create a problem-free, disease-free society. "We are inviting governments to act on our offer now. Why allow your people to suffer any longer?"
